

Track every brick, every rupee, every day.

The construction project tracking platform for site teams -
mobile, web portal, admin console and a secure REST API on MySQL.

OFFLINE-FIRST MOBILE

LIVE STOCK

GPS PHOTOS

ROLE-BASED ACCESS

Four apps, one source of truth

Mobile app (Expo)

Offline-first site capture:
progress + GPS photos,
attendance, issues,
inspections, push alerts.

Web portal (React)

Projects and materials,
Req > PO > GRN > use,
BOQ vs actual, billing,
sales, 16 reports.

Admin panel

Users, permission matrix,
project access control,
master data, audit logs,
broadcasts.

REST API + MySQL 8

Express, JWT, RBAC,
55 tables, audit trail,
uploads, rate limits,
smoke-tested in CI.

Built for the whole project lifecycle

EXECUTION

- + Daily progress reports
- + GPS + timestamp photos
- + Offline queue, auto-sync
- + Milestone roll-up
- + Drawing revisions

MATERIALS

- + Req > PO > GRN > use
- + Auto tax & discount totals
- + Stock ledger, low-stock
- + Damaged / return flow
- + Supplier & rate masters

PEOPLE & QUALITY

- + Attendance + OT wages
- + Payments from registers
- + Test report approvals
- + Checklist inspections
- + Issue track & close

MONEY & INSIGHT

- + BOQ estimate vs actual
- + Qty / cost variance %
- + Cost & payment status
- + Sales, GST, collections
- + Dashboards + CSV export

SECURE BY DESIGN

- JWT access + rotating refresh tokens, bcrypt hashing
- RBAC: 8 actions x 21 modules, custom roles
- Project & wing-level data scoping per user
- Audit trail with old/new values on every change
- Parameterized SQL, rate limiting, validated uploads

55

MySQL tables

150+

API endpoints

16

ready reports

4

apps incl. mobile

100%

offline capture
